Packaging Solutions

Innova Pack is a leading manufacturer and printer of film, laminates, pre-made pouches and bags.

Our packaging solutions are tailored to the specific needs of our customers and backed by in-depth know-how and cutting edge converting and printing technologies.

Our expertise in lamination allows us to produce laminates for all kinds of Form-Fill-and-Seal (FFS) applications. Depending on your product, we will provide a solution to ensure optimum barrier properties and seal integrity.

Our high-quality laminates are converted into a broad range of pre-made packaging formats, such as flat bottom pouches, stand-up pouches, quad sealed bags, side gusseted bags, spout pouches and sachets.

We strive to stay ahead of the competition through the introduction of innovative features to enhance the performance of our packaging, such as closure systems, handles, degassing and odour valves, laser scoring and perforations, etc.

Utilising HD rotogravure print technology ensures the highest dots per inch and guarantees the highest shelf impact for your product.

Our production sites are purpose-built to be compliant with the latest BRC and ISO standards for pharmaceutical and food grade packaging.

Our innovative packaging solutions will empower your brand and will make your product a winner, with its own brand identity and different from the rest.

PACKAGING YOUR PRODUCT

INNOVA PACK

FLEXIBLE PACKAGING 

Our Products

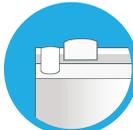

Flat Bottom Pouch

Flat Bottom Pouch (Box pouch)

High strength and offers stability and visibility on the shelves thanks to the flat bottom. The sides and bottom can also be used for branding.

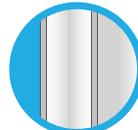

PUSH LOCK ZIPPER

TOP SLIDER CLOSURE

FLAT BOTTOM

TRANSPARENT WINDOW

RECYCLABLE

LASER SCORING AND MICRO-PERFORATIONS

EASY OPEN TEAR NOTCH

DIE CUT HANDLE

DIE CUT DUAL HANDLE

Flat bottom

Transparent window

The Stand Up Pouch (Doypack)

Is a trendy and cost effective format that remains up straight and does not lean on the shelves. Your product will have high visible impact and stand out from the competition. The Stand Up Pouch is also very environmentally friendly since fewer materials are used in comparison to other packaging formats.

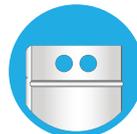

PUSH LOCK ZIPPER

TOP SLIDER CLOSURE

DIE CUT HANDLE

DIE CUT DUAL HANDLE

EASY OPEN TEAR NOTCH

LASER SCORING AND MICRO-PERFORATIONS

RECYCLABLE

Tear notch and push-lock zipper

Logo printed on bottom

Roll Stock Film

We are able to produce Rolls of film using different laminates depending on your product, intended shelf life, and the specifications of your machinery (Horizontal or Vertical Form Fill and Seal...)

We use only the finest rotogravure machinery, which is able to transfer more ink than other methods of printing, ensuring the highest dots per inch and guaranteeing the highest shelf impact for your product.

Printed rolls are very popular in the snacking industry (crisps, candy, sweets, sachets for sports supplements...)

Spout pouches

A good alternative to more rigid types of packaging. On top of being a more cost effective solution because of less waste and full printing possibilities, they also drive visual impact and offer consumers more value such as hassle free opening and reclose-ability. Spout pouches can be used for all sorts of applications: drinks, salad dressings, sauces, yogurt, sun lotion...

The Spout pouch can stand up on the shelves or have a Euro-hook at the opposite end to allow it to hang between shelves. Depending on the intended use and shelf life needed, spout pouches can come in 2,3 or 4 layer laminates. The diameter of the spout itself comes in different sizes ensuring that it will be compatible with the filling machine.

Why choose Innova Pack?

Our mission is to make flexible packaging available to small and medium sized companies.

We have over twenty five years experience in manufacturing high quality, flexible packaging.

To achieve this goal we are focused on:

- Quality products
- Bespoke Design
- Product innovation
- Excellence in customer service

We are packaging manufacturers with our European sales office based in Belfast. We support small businesses and the launch of new products by offering the

- Lowest set up costs in Europe.
- No minimum orders.
- No print contract.
- Free design service on orders over 10,000 units.
- Free printing plates for large orders.

We help our clients gain insight into the print environment. By explaining the technical aspects we streamline the process and help reduce their costs.

Our wide range of packaging products combined with innovative design has gained Innova Pack a growing presence in the flexible packaging market.
