# Lost in a Jigsaw™

## Instructions

In **Lost in A Jigsaw™**, you are trapped inside a magical garden maze. You will need all your puzzling and adventure skills to escape. Begin by assembling all the nine piece diamond shaped maze sections, and all the edge scenes. Then find your starting point. Now you can begin to assemble the escape path. Each exit in a scene will match exactly with the entrance to another. You will **not**, in most cases, be able to use the artwork to assemble the scenes. The puzzle is not finished until all the scenes are placed with their entrances and exits correctly paired, and of course until there is one and only one path for the hero to escape.

### Hints & Rules:

No, you can't climb over the walls!

Each scene is viewed from the same perspective. (make sure there are no upside down creatures!)

Your character can always get around a unicorn, a bear, or other varmint. You are an intrepid traveller and will not be deterred!

You may need to take a boat or swing across some peril. A little water can't hurt you!

There are distinct right, left, top and bottom edge scenes. It's easier if you group them together first.

All the nine piece scenes are identically shaped, but when the artwork is upright, there are effectively 2 diamond shapes. Group these to make things easier.

Most of the walls of the maze are hedgerow, but some are made of stone and other materials. Assemble these first. If you get them correctly put together, you will form an 'X' shape.

You start in the exact center of the maze.

All walls must match. You can't attach a stone wall to a hedge wall.

Your escape will take you all over the puzzle. Don't look for a quick solution!
