GAME INSTRUCTIONS

THE OBJECT OF THE GAME

It's showtime and it's up to you to get subscribers to follow your channel! All players race to roll their dice and collect Subscriber cards. The first player to reach 1 million subscribers wins!

GETTING READY TO ROLL!

1. Each player chooses a set of 6 colored dice & the matching speed cup.
2. Shuffle all the Watch This Game! cards.

3. Draw the 3 top cards. Place them face up in the middle of all the players, so everyone can see what cards they are playing for.

In a 2-player game, players only use 2 cards.

HOW TO PLAY

The game is played in a series of rounds.

- To begin a round, players count down to showtime with... "3, 2, 1, SHOWTIME!", then start rolling their dice!
- There are no turns. All players roll their dice at the same time, and at their own speed. Players keep rolling until the round is over.
- Players race to collect Subscriber cards by matching the dice they roll to what is shown on the cards. The more valuable the card, the more challenging the combination.
- After each roll, players place any of their dice next to a card to "book" it. This indicates which cards they are rolling for.

• Dice that are booked on a card cannot be moved or rolled again until the card is won by a player.

• Players do not have to book any dice on a roll. They may re-roll all the dice they currently have available.

• Players must re-roll all dice that are not booked on a card. Sorry, no floaters.

- Players continue booking dice on cards until the combination is matched by a player.
- The first player to book the entire correct combination, *AND grab the card*, wins the card! Hold onto the card to score later.
- Any player that has dice booked on that card may now take them back.
- Players continue to roll dice until all 3 cards in play have been won and collected.
- When all 3 cards are collected, the round is over. Players add up their scores and say their totals out loud.
- Draw 3 new cards and place them face up. Players read the cards and start the next round when ready.
- Rounds are played until there is a winner.

WINNING!

The first player to reach at least 1 million subscribers - and call it out - is the winner!

SPECIAL CARDS

There are 3 other types of cards that appear during play.
Use these cards to slow down other players in the race to 1 million subscribers!

TROLL! CARDS

Play these cards on any player during the round to make them lose subscribers!

Win this card by matching the dice combination shown.
Then give it immediately to another player of your choice.
They must place it in their subscriber score pile.

These cards count against the total number of subscribers they've collected - forcing that player to roll for more subscribers.

GLITCH! CARDS

Play these cards on any player during the round to slow their progress.

Win this card by matching the dice combination shown.
Then give it immediately to another player of your choice.

That player must fix this glitch immediately before rolling for any other cards. To do so, they must roll the combination on the Glitch card to discard it.

If the round ends before the glitch is fixed, it carries over to the next round.
Any dice booked on this card also carry over to the next round.

**If a player has booked too many dice on a card in play and does not have enough dice to complete the glitch combination, they must then wait to get more dice back.*

SYSTEM CRASH! CARDS

There are only 2 of these troublesome cards!

Use these cards on any player during the round to wipe out all of their subscribers.

Win this card by matching the dice combination shown.
Then give it immediately to another player of your choice.

That player must immediately discard ALL cards in their subscriber score pile (including any TROLL cards) – forcing them to reboot and start a new score pile.
